OUTGOING

Modification 3 of Waste Management Licence Number 282

282/m3

ENVIRONMENTAL PROTECTION ACT 1990

ENVIRONMENT AGENCY

SECTION 37

NOTICE OF MODIFICATION OF WASTE MANAGEMENT LICENCE-Mod 3

PERMIT

To H & E Trotter

Low Dyke

Calthwaite

Penrith

Cumbria CA11 9PS

WHEREAS

on 29 September 1994 Cumbria County Council granted to you a waste disposal licence number 282 which in accordance with Section 77(2) of the Environmental Protection Act 1990 (hereinafter called "the 1990 Act") is treated as a Waste Management Licence from 1 May 1994, relating to

Thackwood Landfill, Monkcastle, Southwaite, Cumbria

AND WHEREAS on 17 May 1996 you made an application for the licence conditions to be modified

NOTICE IS HEREBY GIVEN that the Environment Agency modifies the licence conditions as follows:

BY THE DELETION OF CONDITIONS 1, 2, 3, 6, 7, 14, 23, 24, 25 AND 26, REPLACING THEM WITH THE ATTACHED CONDITIONS 1, 2, 3, 6, 7, 14, 23, 24, 25 AND 26.

BY THE ADDITION OF THE ATTACHED CONDITION 42

Such modification shall take effect on 27 August 1996 at 07.00 hrs

DATED 22 August 1996. Signed R Robinson
ROBINSON

Designation WASTE REGULATION MANAGER

Environment Agency, North Area, Chertsey Hill, London Road, Carlisle CA1 2QX

N.B. The person on whom this notice is served may appeal against the Environment Agency's decision to the Secretary of State within six months or such longer period as the Secretary of State may allow.(See notes overleaf)

Appeals to Secretary of State from decisions with respect to licences.

43.—(1) Where, except in pursuance of a direction given by the Secretary of State,—

(a) an application for a licence or a modification of the conditions of a licence is rejected;

(b) a licence is granted subject to conditions;

(c) the conditions of a licence are modified;

(d) a licence is suspended;

(e) a licence is revoked under section 38 or 42 above;

(f) an application to surrender a licence is rejected; or

(g) an application for the transfer of a licence is rejected;

then, except in the case of an application for a transfer, the applicant for the licence or, as the case may be, the holder or former holder of it may appeal from the decision to the Secretary of State and, in the case of an application for a transfer, the proposed transferee may do so.

(2) Where an appeal is made to the Secretary of State—

(a) the Secretary of State may refer any matter involved in the appeal to a person appointed by him for the purpose;

(b) the Secretary of State may, instead of determining the appeal himself, direct that the appeal or any matter involved in it shall be determined by a person appointed by him for the purpose (who shall have the same powers as the Secretary of State);

(c) if a party to the appeal so requests, or the Secretary of State so decides, the appeal shall be or continue in the form of a hearing (which may, if the person hearing the appeal so decides, be held or held to any extent in private).

(3) Where, on such an appeal, the Secretary of State or other person determining the appeal determines that the decision of the authority shall be altered it shall be the duty of the authority to give effect to the determination.

(4) While an appeal is pending in a case falling within subsection (1)(c) or (e) above, the decision in question shall, subject to subsection (6) below, be ineffective; and if the appeal is dismissed or withdrawn the decision shall become effective from the end of the day on which the appeal is dismissed or withdrawn.

(5) Where an appeal is made in a case falling within subsection (1)(d) above, the bringing of the appeal shall have no effect on the decision in question.

(6) Subsection (4) above shall not apply to a decision modifying the conditions of a licence under section 37 above or revoking a licence under section 38 or 42 above in the case of which the notice effecting the modification or revocation includes a statement that in the opinion of the authority it is necessary for the purpose of preventing or, where that is not practicable, minimising pollution of the environment or harm to human health that that subsection should not apply.

(7) Where the decision under appeal is one falling within subsection (6) above or is a decision to suspend a licence, if, on the application of the holder or former holder of the licence, the Secretary of State or other person determining the appeal determines that the authority acted unreasonably in excluding the application of subsection (4) above or, as the case may be, in suspending the licence, then—

(a) if the appeal is still pending at the end of the day on which the determination is made, subsection (4) above shall apply to the decision from the end of that day; and

(b) the holder or former holder of the licence shall be entitled to recover compensation from the authority in respect of any loss suffered by him in consequence of the exclusion of the application of that subsection or the suspension of the licence;

and any dispute as to a person's entitlement to such compensation or as to the amount of it shall be determined by arbitration or in Scotland by a single arbiter appointed, in default of agreement between the parties concerned, by the Secretary of State on the application of any of the parties.

(8) Provision may be made by the Secretary of State by regulations with respect to appeals under this section and in particular—

(a) as to the period within which and the manner in which appeals are to be brought; and

(b) as to the manner in which appeals are to be considered.

1. **Working Plan**

1.1. The areas that are the subject of this licence are outlined in red on Drawing number THW.1.1/VCD.

1.2. The site shall be operated in all respects as described in the working plan and shall additionally be subject to the conditions below.

1.3. The working plan shall consist of the Cumbria County Council Application Form and all documents, plans, drawings or other submissions made as part of the application and listed on the Application Form under Section 21. In the case of any proposals contained in the working plan being contradictory to the licence conditions, the conditions shall prevail.

1.4. Additionally the Working plan shall consist of the Environment Agency Application Form for Modification of a Waste Management Licence dated 17 May 1996 and all documents, plans, drawings or other submissions made as part of this application and listed on the Application Form under Section 64, 65 and 66. In the case of any proposals contained in the working plan being contradictory to the licence conditions, the conditions shall prevail.

1.5. The working plan may be varied, and such variations shall be deemed to be part of the working plan. No variation shall be brought into effect until details have been submitted in writing to the Environment Agency, and their written confirmation of receipt has been received.

1.6. Any notification which the licence holder is required to make under these conditions shall be made to:

The Environment Agency
Chertsey Hill
London Road
CARLISLE
CA1 2QX

Tel 01228 25151
Fax 01228 49734

2. **PERMITTED WASTES**

The total quantity of waste deposited shall not exceed 2,125 tonnes per week and shall not exceed 74,999 tonnes per annum.

A. LANDFILL

2.1. **Solid Waste**

Only solid wastes of the following description shall be deposited.

2.1.1. Inert Material

Not more than 200 tonnes per week.

Inert material shall consist of:

2.1.1.1. soil, sand, clay, stone, concrete, bricks, slate, glass, and ceramic materials. Such inert material must not be contaminated with any leachate forming materials, including any of the following wastes (which are listed for the purposes of illustration only): paper, cardboard, foodstuffs, animal flesh, vegetable matter, plaster, plasterboard, wood, timber, sawdust, textiles, metal and plastic objects,

2.1.1.2. hard bonded asbestos products arising from building demolition or construction work.

2.1.2. Waste From Construction, Demolition or Building

Not more than 200 tonnes per week.

Waste from construction, demolition or building shall be waste containing mainly inert materials as described above, but also non-inert materials which arise necessarily from construction, demolition or building of any structure (which includes improvement, repair or alteration of a building or structure).

2.1.3. Household Waste

Not more than 500 tonnes per week.

Waste defined as household waste by Section 75(5) of the Environmental Protection Act 1990 and The Controlled Waste Regulations 1992 excluding any clinical waste as defined in The Controlled Waste Regulations 1992.

2.1.4. Commercial Waste

Not more than 600 tonnes per week.

Waste defined as commercial waste by Section 75(7) of The Environmental Protection Act 1990 and The Controlled Waste Regulations 1992, excluding any clinical waste as defined in The Controlled Waste Regulations 1992.

2.1.5. Industrial Waste

Not more than 600 tonnes per week.

Waste defined as industrial waste by Section 75(6) of The Environmental Protection Act 1990 and The Controlled Waste Regulations 1992, excluding any clinical waste as defined in The Controlled Waste Regulations 1992.

2.2. **Liquid Waste and Special Waste**

No liquid waste or special waste (as defined by The Control of Pollution (Special Waste) Regulations 1980) shall be deposited.

2.3. **Difficult Waste**

No difficult waste (as listed in Appendix 7c of Waste Management Paper 26) shall be deposited except for the following waste types and quantities :

Waste Description	Code of Waste
Scrap Rubber	L30
Empty Used Containers	Q30
Sewage Sludge	Q40
Food Processing Waste	T20
Animal Processing Waste	T10

The quantity of difficult waste shall not exceed 20% of the total quantity of waste deposited on the site in any calendar month.

2.4. **Clinical Waste**

Not more than 25 tonnes per week.

Clinical Waste is defined in The Controlled Waste Regulations 1992.

Only wastes defined by groups C, D and E in paragraph 3.1.1 of Waste Management Paper 25 shall be deposited. Each load shall be disposed of in accordance with condition 26 of this licence.

No waste defined by groups A (which includes animal carcasses arising from veterinary and similar premises) and B of paragraph 3.1.1 of Waste Management Paper 25, shall be deposited. (The clinical waste groups are described in the explanatory note at the end of this licence).

B. WASTE TRANSFER

2.5. **Solid Waste**

Only solid wastes of the following description shall be deposited.

2.5.1. Inert Material

Not more than 200 tonnes per week.

Inert material shall consist of:

2.5.1.1. soil, sand, clay, stone, concrete, bricks, slate, glass, and ceramic materials. Such inert material must not be contaminated with any leachate forming materials, including any of the following wastes (which are listed for the purposes of illustration only): paper, cardboard, foodstuffs, animal flesh, vegetable matter, plaster, plasterboard, wood, timber, sawdust, textiles, metal and plastic objects,

2.5.2. Waste From Construction, Demolition or Building

Not more than 200 tonnes per week.

Waste from construction, demolition or building shall be waste containing mainly inert materials as described above, but also non-inert materials which arise necessarily from construction, demolition or building of any structure (which includes improvement, repair or alteration of a building or structure).

2.5.3. Household Waste

Not more than 500 tonnes per week.

Waste defined as household waste by Section 75(5) of the Environmental Protection Act 1990 and The Controlled Waste Regulations 1992 excluding any clinical waste as defined in The Controlled Waste Regulations 1992.

2.5.4. Commercial Waste

Not more than 600 tonnes per week.

Waste defined as commercial waste by Section 75(7) of The Environmental Protection Act 1990 and The Controlled Waste Regulations 1992, excluding any clinical waste as defined in The Controlled Waste Regulations 1992.

2.5.5. Industrial Waste

Not more than 600 tonnes per week.

Waste defined as industrial waste by Section 75(6) of The Environmental Protection Act 1990 and The Controlled Waste Regulations 1992, excluding any clinical waste as defined in The Controlled Waste Regulations 1992.

2.6. **Liquid Waste, Clinical Waste and Special Waste**

No liquid waste, clinical waste (as defined by the Controlled Waste Regulations 1992) or special waste (as defined by The Control of Pollution (Special Waste) Regulations 1980) shall be accepted at the waste transfer facility.

2.7. **Difficult Waste**

No difficult waste (as listed in Appendix 7c of Waste Management Paper 26) shall be accepted at the waste transfer facility except for the following waste types and quantities :

Waste Description	Code of Waste
Scrap Rubber	L30
Empty Used Containers	Q30

The quantity of difficult waste shall not exceed 20% of the total quantity of waste accepted at the site in any calendar month.

3. **Reception of Waste**

3.1. All waste arriving at the site shall be inspected before deposit at the landfill or acceptance at the waste transfer facility and any load not conforming to the permitted waste types specified in Condition 2 shall be rejected.

3.2. Where waste is found upon deposit at the landfill or upon acceptance at the waste transfer facility to contain wastes not permitted by Condition 2, not previously detected, the whole load shall be removed immediately to a specified storage area or from the site.

3.3. The specified storage area for the storage of wastes awaiting removal, in accordance with Condition 3.2, shall be the area marked "Emergency Tipping Area" on drawing no.THW 1.7/JAR.

3.4. The maximum period non-permitted waste may remain at the specified storage area is five days. The Environment Agency shall be notified before the end of the working day on which such waste is received at the site.

3.5. Only waste types that have been accepted at the transfer facility in accordance with condition 2 and have subsequently been sorted into specific waste types may be

stored on the areas shown on drawing number THW 1.7/JAR.

6. **Hours of Operation**

The site shall be open for the receipt, transfer, treatment and disposal of wastes only within the following hours.

Monday to Friday	07.00 to 19.00
Saturdays	07.00 to 12.00

The site shall not be open for the receipt, transfer, treatment or disposal of waste on Sundays or Bank Holidays without the prior written consent of the County Planning Authority and the Environment Agency.

7. **Record Keeping and Recording of Incoming and Outgoing Waste**

A. LANDFILL OPERATIONS

Incoming Waste

7.1. A record shall be kept of the types and quantities of waste deposited on the site. The record shall give an accurate description of:

7.1.1. the person, firm or organisation delivering the waste to the site,

7.1.2. the registration number of each vehicle delivering waste to the site,

7.1.3. the source of arising of the waste,

7.1.4. the quantity, in cubic metres or tonnes, and detailed description of each individual load and its classification in accordance with the types of waste described in Condition 2 of this licence.

7.2. Upon receipt of a written request, and where deposits are restricted to limited sources of waste, or restricted numbers of vehicles depositing waste, the Environment Agency may agree a more limited form of record keeping. This shall be implemented only with written agreement from the Environment Agency.

7.3. The record made in accordance with condition 7.1 or 7.2 above shall be retained by the licence holder for two years and shall be made available for inspection by the Environment Agency on request.

7.4. A summary of the waste deposited at the site in each calendar month including a nil return in the event of no deposit shall be forwarded to the Environment Agency not later than the 14th day of the month following the month to which the summary relates.

7.4.1. The summary shall be submitted on Form WRA 1, provided by the Environment Agency and shall include the following information,

7.4.1.1. the quantity of each waste classified in accordance with the types of waste described in condition 2 of this licence,

7.4.1.2. the total quantity of waste deposited at the site during the month to which the summary relates.

7.5. A summary of the waste deposited at the site in each twelve month period between 1 April in any year and 31 March in the following year shall be forwarded to the Environment Agency no later than 30 days after the end of the twelve month period to which the summary relates.

7.5.1. The summary shall be submitted on Form WRA 2, provided by the Environment Agency and shall include the following information;

7.5.1.1 the quantity of each waste classified in accordance with the types of waste described in condition 2 of this licence,

7.5.1.2 the total quantity of waste deposited at the site during the period to which the summary relates,

7.5.1.3 the remaining licensed landfill capacity as at 31 March of the year to which the summary relates.

7.6. Copies of the yearly and monthly summaries shall be retained by the licence holder for two years from the date of submission to the Environment Agency.

B WASTE TRANSFER OPERATIONS

Incoming Waste

7.7 A record shall be kept of the types and quantities of all waste delivered to the site. The record shall give an accurate description of:

7.7.1 the person, firm or organisation delivering the waste to the site,

7.7.2 the registration number of each vehicle delivering waste to the site,

7.7.3 the source of arising of the waste

7.7.4 the quantity, in cubic metres or tonnes, and detailed description of each individual load and its classification as to types of waste described in condition 2 of this licence.

7.8 Upon receipt of a written request, and where incoming waste is restricted to limited sources of waste, or restricted numbers of vehicles delivering waste, the Environment Agency may agree a more limited form of record keeping. This shall be implemented only with written agreement from the Environment Agency.

7.9 The record made in accordance with condition 7.7 or 7.8 above shall be retained by the licence holder for two years and shall be made available for inspection by the

Environment Agency on request.

7.10 A summary of the waste delivered to the site in each calendar month including a nil return in the event of no deposit shall be forwarded to the Environment Agency not later than the 14th day of the month following the month to which the summary relates.

7.10.1 The summary shall be submitted on form WRA 3, provided by the Environment Agency and shall include the following information.

7.10.1.1 the quantity of each waste classified in accordance with the types of waste described in condition 2 of this licence,

7.10.1.2 the total quantity of waste deposited at the site during the month to which the summary relates.

7.11 A summary of the waste delivered to the site in each twelve month period between 1 April in any year and 31 March in the following year shall be forwarded to the Environment Agency no later than 30 days after the end of the twelve month period to which the summary relates.

7.11.1 The summary shall be submitted on form WRA 4, provided by the Environment Agency and shall include the following information :

7.11.1.1 the quantity of each waste classified in accordance with the types of waste described in condition 2 of the licence,

7.11.1.2 the total quantity of waste deposited at the site during the period to which the summary relates.

7.12 Copies of the yearly and monthly summaries shall be retained by the licence holder for two years from the date of submission to the Environment Agency.

Outgoing Waste

7.13 A record shall be kept of the types and quantities of all waste removed from the site. The record shall give an accurate description of:

7.13.1 the person, firm of organisation removing the waste from the site ,

7.13.2 the registration number of each vehicle removing waste from the site,

7.13.3 **where waste is intended for disposal,** the quantity, detailed description of each individual load and its classification as to types of waste described in condition 2 of this licence,

7.13.4 **where waste is intended for recycling,** the quantity and detailed description of each individual load in a manner which adequately identifies the type of material,

7.13.5 the destination of the waste.

7.14 Upon receipt of a written request, and where removal of waste is restricted to limited types of waste, or restricted numbers of vehicles removing the waste, the Environment Agency may agree to a more limited form of record keeping. This shall be implemented only with written agreement from the Environment Agency.

7.15 The record made in accordance with the condition 7.13 or 7.14 above shall be retained by the licence holder for two years and shall be made available for inspection by the Environment Agency on request.

7.16 A summary of the waste removed from the site in each calendar month including a nil return in the event of no removal shall be forwarded to the Environment Agency not later than the 14th day of the month following the month to which the summary relates.

7.16.1 The summary shall be submitted on Form WRA 3, provided by the Environment Agency and shall include the following information:

7.16.1.1 **where the waste is intended for disposal,** the quantity of each waste classified in accordance with the types of waste described in condition 2 of this licence,

7.16.1.2 **where waste is intended for recycling,** the quantity and description of each waste type described in a manner which adequately identifies the type of material,

7.16.1.3 the total quantity of waste removed from the site during the month to which the summary relates.

7.17 A summary of the waste removed from the site in each twelve month period between 1 April in any year and 31 March in the following year shall be forwarded to the Environment Agency no later than the 30 days after the end of the twelve month period to which the summary relates.

7.17.1 The summary shall be submitted on Form WRA 4, provided by the Environment Agency and shall include the following information:

7.17.1.1 **where the waste is intended for disposal,** the quantity of each waste classified in accordance with the types of waste described in condition 2 of this licence,

7.17.1.2 **where waste is intended for recycling,** the quantity and description of each waste type described in a manner which adequately identifies the type of material,

7.17.1.3 the total quantity of waste removed from the site during the months to which the summary relates.

7.18 Copies of the yearly and monthly summaries shall be retained by the licence holder for two years from the date of submission to the Environment Agency.

14. **Site Preparation**

A LANDFILL

14.1. The cells shall be constructed as shown in The Working Plan. The base of each cell shall be formed so that there is a fall to the leachate pumping chamber.

14.2. Before any waste is deposited in any cells a temporary clay bund two metres high shall be left in place around the perimeter of cells 2,3,4 and 5 to isolate any waste deposited in one cell from cells that have not yet been prepared for infilling.

14.3. No waste shall be deposited within two metres in any direction from the top of the temporary bund.

14.4. When infilling of waste in cell 3 commences the temporary bund between cell 2 and cell 3 shall be removed. Similarly when infilling of waste in cell 4 occurs the bund between cell 2 and cell 4 shall be removed and when infilling of waste in cell 5 occurs the bund between cell 4 and cell 5 and cell 3 and cell 5 shall be removed.

14.5. Before the deposit of waste in any cell:

14.5.1. the levels of the base of the cell, including its lowest point, shall be taken and submitted to the Environment Agency and

14.5.2. measurements shall be taken on the base of the site to demonstrate that the in situ clay has a depth of at least 3 metres. The method and number of measurements shall be agreed in writing with the Environment Agency. The results of such measurements shall be inspected and approved by the Environment Agency .

14.5.3. the cell shall be inspected and approved by the Environment Agency .

14.6. Where waste is deposited outside the cells but within the licensed area, the area shall be sealed in accordance with the National Rivers Authority (North West Unit) Earthworks on Landfill Sites. Before deposit of waste the area shall be inspected and approved by the Environment Agency .

B WASTE TRANSFER

14.7. The Waste Transfer Facility Building shall be constructed as shown on drawing number P4448/1A. Any subsequent material change to the building construction shall be notified to the Environment Agency together with a detailed plan.

14.7.1. The base of the building shall be constructed with an impermeable concrete base (of not less than 15 cm thick) draining to a sealed tank. The base shall be inspected at regular intervals and repaired as necessary to ensure the integrity of the basal seal.

14.7.2 The method and construction of the sealed tank shall be approved by the Environment Agency and shall be tested prior to use to ensure that there are no leaks.

14.7.3 The sealed tank shall be inspected yearly, by a method to be agreed in writing with the Environment Agency, to ensure that there are no leaks. The results of the inspection shall be forwarded to the Environment Agency no later than a month after the inspection has been carried out.

14.8 The storage areas for materials that have been segregated in the waste transfer facility building shall be constructed as shown on drawing number THW 1.7/JAR.

14.8.1 The container standing area shall be drained via a perforated pipe and silt and oil interceptor to the surface water ditches. The silt and oil interceptor shall be constructed to a design approved by the Environment Agency and shall be regularly inspected and maintained.

23. **Handling and Compaction of Waste**

A LANDFILL OPERATIONS

23.1. The site shall be equipped with suitable machinery to handle and compact wastes received at the site.

23.2. Machinery used for compaction and covering of wastes shall be either a tracked vehicle, steel wheeled compactor, or rubber tyred loading shovel.

23.3. Machinery shall be maintained in working order.

23.4. Any breakdown of machinery which results in failure to comply with any of the conditions of this licence shall be notified to the Environment Agency before the end of the working day on which the breakdown occurs.

B WASTE TRANSFER OPERATIONS

23.5 The transfer facility shall be equipped with suitable machinery to handle wastes received at this facility.

23.6 Machinery shall be maintained in working order.

23.7 Any breakdown of machinery which results in failure to comply with any of the conditions of this licence shall be notified to the Environment Agency before the end of the working day on which the breakdown occurs.

23.8 Waste delivered to the waste transfer facility shall only be discharged onto the floor of the building and not onto the ground outside the building.

23.9 All putrescible waste is to be removed from the waste transfer building by the end of

each working day and either removed from the site to another suitably licensed facility or landfilled.

23.10 All demountable containers used for the storage of waste on site, including segregated materials, shall not be filled beyond their design capacity and should be sheeted or covered when not in use.

23.11 Precautions are to be taken to ensure that dust and liquids from operations within the building do not escape from the building.

24. **Handling Hard-Bonded Asbestos Products**

24.1 Hard-bonded asbestos products shall not be used for the construction or repair of site access roads or vehicle parks, or be handled or deposited on any part of the site such that they are subject to abrasion and release of fibres.

A LANDFILL OPERATIONS

24.2 All hard-bonded asbestos products shall be deposited at the foot of the working face and covered by the end of the working day.

B WASTE TRANSFER OPERATIONS

24.3 All hard bonded asbestos should be handled in a manner such that it is not subject to abrasion and release of fibres.

25. **Handling of Difficult Wastes**

A LANDFILL OPERATION

25.1 All difficult waste or waste likely to be the source of odour shall be deposited at the foot of the working face and covered with other wastes immediately after deposit, so as not to be within one metre of the surface or flanks of the working area.

B WASTE TRANSFER OPERATIONS

25.2 All difficult waste or waste likely to be the source of odour shall be removed from the waste transfer building at the end of each working day and either be landfilled in accordance with condition 25.1 or removed from site to a suitably licensed facility.

26. **Handling and Deposit of Clinical Waste**

A LANDFILL

26.1. No clinical waste is to be accepted for landfilling unless the Environment Agency have been prenotified of the intention to landfill at least two days before the waste is accepted.

26.1.1. The method of pre-notification shall be the full and accurate completion of a CW2 Form (supplied by the Environment Agency) and the furnishing of that form to the Environment Agency so as to arrive in the normal course of post (first class) not more than one month and not less than 2 clear days before the removal of the waste. (In calculating this period of days any Saturday, Sunday, Good Friday, Christmas Day, Bank Holiday or other public holiday shall be disregarded).

26.1.2. Condition 26.1 above does not apply to clinical waste which is delivered to the landfill site from a premises licensed for the keeping of clinical waste within Cumbria.

26.2. All clinical waste accepted at the site for landfill shall be in sealed yellow bags with a black band.

26.3. All clinical waste accepted at the site for landfill, shall be deposited at the foot of the working face and covered with other wastes immediately after deposit, so as not to be within one metre of the surface or flanks of the working area.

B WASTE TRANSFER

26.4 No clinical waste is to be accepted at the waste transfer building.

42. **Financial Provisions**

Within three months of the date of issue of this licence the details for the operation and administration of a bond shall be agreed in writing with the Environment Agency and shall be entered into in accordance with the agreement. The amount of money which shall form the bond will be as agreed in the faxed Environment Agency letter to H & E Trotter dated 15 August 1996
