### Introductory note

#### **This introductory note does not form a part of the permit**

The main features of the permit are as follows.

The bespoke permit application is for two waste operations, the recovery of waste for the construction and the physical treatment of waste to produce material which will be used for recovery on site. The treatment operation will remain for the production of aggregate as part of the companies recycling operation once the recovery operation is complete.

The site is located in South Gloucestershire and is within the relevant screening distance of a local wildlife site. The site also lies on a Secondary B bedrock aquifer. Suitable measures have been put in place to protect these designations

The status log of the permit sets out the permitting history, including any changes to the permit reference number.
