Notice of variation and consolidation with introductory note

The Environmental Permitting (England & Wales) Regulations 2016

NORTH LONDON WASTE AUTHORITY

Leyton Reuse & Recycling Centre
Gateway Road
London
E10 5BY

Variation application number

EPR/PP3493EQ/V004

Permit number

EPR/PP3493EQ

Leyton Reuse & Recycling Centre
Permit number EPR/PP3493EQ

Introductory note

This introductory note does not form a part of the permit

Under the Environmental Permitting (England & Wales) Regulations 2016 (schedule 5, part 1, paragraph 19) a variation may comprise a consolidated permit reflecting the variations and a notice specifying the variations included in that consolidated permit.

Schedule 1 of the notice specifies the conditions that have been varied and schedule 2 comprises a consolidated permit which reflects the variations being made. All the conditions of the permit have been varied and are subject to the right of appeal.

The Environment Agency has a duty, under the Environmental Permitting (England and Wales) Regulations 2016, regulation 34(1), to periodically review permits. As part of this variation, we have reviewed the permit and made the changes to necessarily reflect current standards and best practice, which principally relate to the implementation of our technical guidance 'Non-hazardous and inert waste: appropriate measures for permitted facilities'.

The 'Non-hazardous and inert waste: appropriate measures for permitted facilities' guidance was published on the GOV.UK website on 12 July 2021 (updated on 8 December 2022 and 1 August 2023). This guidance sets out the standards that are relevant to regulated facilities with a permit to store, treat or transfer (or both) non-hazardous and inert wastes.

The relevant parts of the following Appropriate Measures apply to this facility:

The 'Waste electrical and electronic equipment (WEEE): appropriate measures for permitted facilities' guidance was published on the 13 July 2022 (updated on 13 July 2022). This guidance sets out the standards that apply to regulated facilities with a permit to treat or transfer all types of WEEE, including materials derived from WEEE processing that require further treatment to comply with the WEEE Directive.

The 'Waste temperature exchange equipment: appropriate measures for permitted facilities' guidance was published on the 13 July 2022 (updated on 13 July 2022). This guidance sets out the standards that apply to regulated facilities with a permit to treat or transfer all types of waste temperature exchange equipment (WTEE), including equipment containing refrigerants, insulation foam, compressors and any hazardous components or other regulated refrigerant gases.

The 'Chemical waste: appropriate measures for permitted facilities' guidance was published on the 18 November 2020 (updated on the 18 November 2020). This guidance sets out the standards that apply to regulated facilities with a permit to treat or transfer all types of Chemical waste, including acids, alkalis, solvents, laboratory chemicals, pesticides, oils, and other hazardous chemical residues requiring secure storage, containment, and compliant onward transfer.

We may also have made consequential changes due to the review that we have initiated.

Those changes are:

Pre-Operational Condition PO1 has been added following the operator's confirmation that the site is closed, and the permit may be surrendered in due course. It prohibits the resumption of any site activities until the operator provides the required information, giving regulatory assurance without forcing an immediate decision. PO1 also preserves flexibility for the operator to determine the site's long-term future.

The operator is currently undergoing an administrative change. To manage the inactive ("mothballed") status, the site will rely on a ceased-activities position. A pre-operational condition has been imposed, therefore no

permittable activities can restart until the operator has provided the required information. A review of the permit has been undertaken and the pre-operational condition acts as the control to prevent any unreviewed resumption of site operations.

The main features of the site are as follows:

The site operates as a Household Waste Recycling Centre (HWRC) accepting household-origin municipal wastes, along with specified hazardous household wastes. Waste activities on-site are limited to the storage of waste pending recovery or disposal, and to low-risk physical treatment such as sorting, separation, and compaction, in addition to authorised recycling and reclamation processes. All waste handling takes place on impermeable surfacing with sealed drainage, using fixed bays, sealed containers, and designated hazardous-waste areas. Both internal and external storage are permitted, provided that all wastes remain segregated, contained, and controlled.

The regulated facility comprises of:

- Household waste recycling centre (HWRC)

Activities at the facility include the acceptance, storage, and low-risk physical treatment of mixed dry recyclables, garden waste, bulky waste, metals, plastics, wood, tyres, soil and stones, WEEE, and specified hazardous household wastes such as waste oils, lead-acid batteries, fluorescent tubes, pesticides, bonded asbestos, and paint wastes. Treatment processes are restricted to manual and mechanical sorting, separation, and compaction, alongside authorised recovery operations for organic substances, metals, and other inorganic materials. The facility also stores and bulks both non-hazardous and hazardous household wastes, which are kept within fixed bays, sealed containers, or secure specialist storage areas. The facility's total annual throughput is limited to 23,600 tonnes and it is situated within a commercial-industrial area, with the closest receptors being the industrial units situated directly along Gateway Road and the Oliver Road Allotment Site, adjacent to the site boundary. Additional commercial and industrial receptors include businesses and logistics operations along Orient Way, approximately 50-150m from the site boundary. Other receptors include residential properties on Ruckholt Road approximately 150-300m northeast of the site boundary. The River Lea is approximately 180-250m east of the site boundary.

Both enclosed and external operational areas are constructed on impermeable surfacing with sealed drainage systems. Processed or stored wastes are held either within dedicated buildings or in authorised external bays and containers, all located on impermeable, drained hardstanding. Hazardous wastes, including oils, batteries, and asbestos, are stored in secure, sealed, or covered units within the designated hazardous-waste storage area.

The schedules specify the changes made to the permit.

The status log of the permit sets out the permitting history, including any changes to the permit reference number.

Status log of the permit		
Description	**Date**	**Comments**
Waste Management Licence issued EAWML 80728	07/04/2006	Original permit issued to London Borough of Waltham Forest.

Application EPR/PP3493EQ/V004 (variation and consolidation)	Environment Agency Initiated Variation	Statutory review of permit. PO1 has been added following the operator's confirmation that the site is closed, and the permit may be surrendered in due course. It prohibits the resumption of any site activities until the operator provides the required information, giving regulatory assurance without forcing an immediate decision. PO1 also preserves flexibility for the operator to determine the site's long-term future.
Environment Agency Non-hazardous & Inert Waste Treatment Sector Review Permit reviewed Variation determined EPR/PP3493EQ	23/03/2026	Varied and consolidated permit issued.

End of introductory note

Notice of variation and consolidation

The Environmental Permitting (England and Wales) Regulations 2016

The Environment Agency in exercise of its powers under regulation 20 of the Environmental Permitting (England and Wales) Regulations 2016 varies EPR/PP3493EQ

Permit number

EPR/PP3493EQ

Issued to

NORTH LONDON WASTE AUTHORITY ("the operator"),

whose registered office is

Unit 1B Berol House
25 Ashley Road
Tottenham Hale
London
N17 9LJ

to operate waste operations at

Leyton Reuse & Recycling Centre
Gateway Road
London
E10 5BY

to the extent set out in the schedules.

The notice shall take effect from

Name	Date
Marcus Woodward	**23/03/2026**

Authorised on behalf of the Environment Agency

Schedule 1

All conditions have been varied by the consolidated permit as a result of an Environment Agency initiated variation.

Schedule 2 – consolidated permit

Consolidated permit issued as a separate document.

Permit

The Environmental Permitting (England and Wales) Regulations 2016

Permit number

EPR/PP3493EQ

This is the consolidated permit referred to in the variation and consolidation notice for application EPR/PP3493EQ/V004 authorising,

NORTH LONDON WASTE AUTHORITY ("the operator"),

whose registered office is

Unit 1B Berol House
25 Ashley Road
Tottenham Hale
London
N17 9LJ

to operate a waste operation at

Leyton Reuse & Recycling Centre
Gateway Road
London
E10 5BY

to the extent authorised by and subject to the conditions of this permit.

Name	Date
Marcus Woodward	**23/03/2026**

Authorised on behalf of the Environment Agency.

Conditions

1 Management

1.1 General management

1.1.1 The operator shall manage and operate the activities:

(a) in accordance with a written management system that identifies and minimises risks of pollution, including those arising from operations, maintenance, accidents, incidents, non-conformances, closure and those drawn to the attention of the operator as a result of complaints; and

(b) using sufficient competent persons and resources.

1.1.2 Records demonstrating compliance with condition 1.1.1 shall be maintained.

1.1.3 Any person having duties that are or may be affected by the matters set out in this permit shall have convenient access to a copy of it kept at or near the place where those duties are carried out.

1.1.4 The operator shall comply with the requirements of an approved competence scheme.

1.2 Avoidance, recovery and disposal of wastes produced by the activities

1.2.1 The operator shall take appropriate measures to ensure that:

(a) the waste hierarchy referred to in Article 4 of the Waste Framework Directive is applied to the generation of waste by the activities; and

(b) any waste generated by the activities is treated in accordance with the waste hierarchy referred to in Article 4 of the Waste Framework Directive; and

(c) where disposal is necessary, this is undertaken in a manner which minimises its impact on the environment.

1.2.2 The operator shall review and record at least every four years whether changes to those measures should be made and take any further appropriate measures identified by a review.

2 Operations

2.1 Permitted activities

2.1.1 The operator is only authorised to carry out the activities specified in schedule 1 table S1.1 (the "activities").

2.2 The site

2.2.1 The activities shall not extend beyond the site, being the land shown edged in red on the site plan at schedule 7 to this permit.

2.3 Operating techniques

2.3.1 The activities shall, subject to the conditions of this permit, be operated using the techniques and in the manner described in the documentation specified in schedule 1, table S1.2, unless otherwise agreed in writing by the Environment Agency.

2.3.2 If notified by the Environment Agency that the activities are giving rise to pollution, the operator shall submit to the Environment Agency for approval within the period specified, a revision of any plan or other documentation ("plan") specified in schedule 1, table S1.2 or otherwise required under this permit which identifies and minimises the risks of pollution relevant to that plan , and shall implement the approved revised plan in place of the original from the date of approval, unless otherwise agreed in writing by the Environment Agency.

2.4 Waste acceptance

2.4.1 Waste shall only be accepted if:

(a) it is of a type and quantity listed in schedule 2 table S2.1

(b) except for household waste accepted from householders, it conforms to the description in the transfer documentation supplied by the producer and holder.

2.5 Technical requirements

Hazardous waste storage and treatment

2.5.1 Hazardous waste shall not be mixed, either with a different category of hazardous waste or with other waste, substances or materials, unless it is authorised by schedule 1 table S1.1 and appropriate measures are taken.

2.6 Pre-operational conditions

2.6.1 The activities shall not be brought into operation until the measures specified in schedule 1 table S1.3 have been completed.

3 Emissions and monitoring

3.1 Emissions of substances not controlled by emission limits

3.1.1 Emissions of substances not controlled by emission limits (excluding odour) shall not cause pollution. The operator shall not be taken to have breached this condition if appropriate measures, including, but not limited to, those specified in any approved emissions management plan, have been taken to prevent or where that is not practicable, to minimise, those emissions.

3.1.2 The operator shall:

(a) if notified by the Environment Agency that the activities are giving rise to pollution, submit to the Environment Agency for approval within the period specified, an emissions management plan which identifies and minimises the risks of pollution from emissions of substances not controlled by emission limits;

(b) implement the approved emissions management plan, from the date of approval, unless otherwise agreed in writing by the Environment Agency.

3.1.3 All liquids in containers, whose emission to water or land could cause pollution, shall be provided with secondary containment.

3.2 Odour

3.2.1 Emissions from the activities shall be free from odour at levels likely to cause pollution outside the site, as perceived by an authorised officer of the Environment Agency, unless the operator has used appropriate

measures, including, but not limited to, those specified in any approved odour management plan, to prevent or where that is not practicable to minimise the odour.

3.2.2 The operator shall:

(a) if notified by the Environment Agency that the activities are giving rise to pollution outside the site due to odour, submit to the Environment Agency for approval within the period specified, an odour management plan which identifies and minimises the risks of pollution from odour;

(b) implement the approved odour management plan, from the date of approval, unless otherwise agreed in writing by the Environment Agency.

3.3 Noise and vibration

3.3.1 Emissions from the activities shall be free from noise and vibration at levels likely to cause pollution outside the site, as perceived by an authorised officer of the Environment Agency, unless the operator has used appropriate measures, including, but not limited to, those specified in any approved noise and vibration management plan to prevent or where that is not practicable to minimise the noise and vibration.

3.3.2 The operator shall:

(a) if notified by the Environment Agency that the activities are giving rise to pollution outside the site due to noise and vibration, submit to the Environment Agency for approval within the period specified, a noise and vibration management plan which identifies and minimises the risks of pollution from noise and vibration;

(b) implement the approved noise and vibration management plan, from the date of approval, unless otherwise agreed in writing by the Environment Agency.

3.4 Pests

3.4.1 The activities shall not give rise to the presence of pests which are likely to cause pollution, hazard or annoyance outside the boundary of the site. The operator shall not be taken to have breached this condition if appropriate measures, including, but not limited to, those specified in any approved pests management plan, have been taken to prevent or where that is not practicable, to minimise the presence of pests on the site.

3.4.2 The operator shall:

(a) if notified by the Environment Agency, submit to the Environment Agency for approval within the period specified, a pests management plan which identifies and minimises risks of pollution, hazard or annoyance from pests;

(b) implement the pests management plan, from the date of approval, unless otherwise agreed in writing by the Environment Agency.

3.5 Fire prevention

3.5.1 The operator shall take all appropriate measures to prevent fires on site and minimise the risk of pollution from them including, but not limited to, those specified in any approved fire prevention plan.

4 Information

4.1 Records

4.1.1 All records required to be made by this permit shall:

(a) be legible;

(b) be made as soon as reasonably practicable;

(c) if amended, be amended in such a way that the original and any subsequent amendments remain legible, or are capable of retrieval; and

(d) be retained, unless otherwise agreed in writing by the Environment Agency, for at least 6 years from the date when the records were made, or in the case of the following records until permit surrender:

(i) off-site environmental effects; and

(ii) matters which affect the condition of the land and groundwater.

4.1.2 The operator shall keep on site all records, plans and the management system required to be maintained by this permit, unless otherwise agreed in writing by the Environment Agency.

4.2 Reporting

4.2.1 The operator shall send all reports and notifications required by the permit to the Environment Agency using the contact details supplied in writing by the Environment Agency.

4.2.2 Within one month of the end of each quarter, the operator shall submit to the Environment Agency using the form made available for the purpose, the information specified on the form relating to the site and the waste accepted and removed from it during the previous quarter.

4.3 Notifications

4.3.1 The Environment Agency shall be notified without delay following the detection of:

(a) any malfunction, breakdown or failure of equipment or techniques, accident, or emission of a substance not controlled by an emission limit which has caused, is causing or may cause significant pollution;

(b) the breach of a limit specified in the permit; or

(c) any significant adverse environmental effects.

4.3.2 Any information provided under condition 4.3.1 shall be confirmed by sending the information listed in schedule 5 to this permit within the time period specified in that schedule.

4.3.3 Where the Environment Agency has requested in writing that it shall be notified when the operator is to undertake monitoring and/or spot sampling, the operator shall inform the Environment Agency when the relevant monitoring and/or spot sampling is to take place. The operator shall provide this information to the Environment Agency at least 14 days before the date the monitoring is to be undertaken.

4.3.4 The Environment Agency shall be notified within 14 days of the occurrence of the following matters, except where such disclosure is prohibited by Stock Exchange rules:

Where the operator is a registered company:

(a) any change in the operator's trading name, registered name or registered office address; and

(b) any steps taken with a view to the operator going into administration, entering into a company voluntary arrangement or being wound up.

Where the operator is a corporate body other than a registered company:

(a) any change in the operator's name or address; and

(b) any steps taken with a view to the dissolution of the operator.

In any other case:

(a) the death of any of the named operators (where the operator consists of more than one named individual);

(b) any change in the operator's name(s) or address(es); and

(c) any steps taken with a view to the operator, or any one of them, going into bankruptcy, entering into a composition or arrangement with creditors, or, in the case of them being in a partnership, dissolving the partnership.

4.3.5 Where the operator proposes to make a change in the nature or functioning, or an extension of the activities, which may have consequences for the environment and the change is not otherwise the subject of an application for approval under the Regulations or this permit:

(a) the Environment Agency shall be notified at least 14 days before making the change; and

(b) the notification shall contain a description of the proposed change in operation.

4.4 Interpretation

4.4.1 In this permit the expressions listed in schedule 6 shall have the meaning given in that schedule.

4.4.2 In this permit references to reports and notifications mean written reports and notifications, except where reference is made to notification being made "without delay", in which case it may be provided by telephone.

Schedule 1 – Operations

Table S1.1 activities – HWRC		
Activity reference	**Description of specified activity and WFD Annex I and II operations**	**Limits of specified activity and waste types**
AR1	**Household waste recycling centre (HWRC)** R3: Recycling/reclamation of organic substances which are not used as solvents R4: Recycling/reclamation of metals and metal compounds R5: Recycling/reclamation of other inorganic materials, D9: Physico-chemical treatment not specified elsewhere in Annex IIA which results in final compounds or mixtures which are discarded by means of any of the operations numbered D1 to D8 and D10 to D12	Secure storage and bulking up of waste listed in Table S2.1 Treatment operations shall be limited to: • Sorting, separation, baling, compaction, and bulking of non-hazardous waste for disposal (no more than 50 tonnes per day) or recovery. There shall be no treatment of waste batteries. There shall be no treatment of hazardous waste. Treatment shall be carried out on an impermeable surface with sealed drainage. No waste types shall be submitted to this activity other than those wastes specified in Schedule 2, Table S2.1.
	Storage of waste R13: Storage of waste pending the operations numbered R1, R4 and R5 (excluding temporary storage, pending collection, on the site where it is produced). D15: Storage pending any of the operations numbered D1 to D14 (excluding temporary storage, pending collection, on the site where it is produced)	Secure storage and bulking of wastes shall take place on an impermeable surface with sealed drainage system. Buildings, covered areas or containers shall meet the following requirements: • buildings, covered areas, or covered containers shall be designed, constructed and maintained to prevent ingress of rain and surface water; • rain and uncontaminated surface water shall be kept separate from contaminated water and other liquids; • containers containing waste shall be stored on an impermeable surface with sealed drainage system. No wastes shall be stored for longer than 6 months. (WTEE) Waste Temperature Exchange Equipment shall not be stored for longer than 3 months. All waste should be stored securely and no more than 157 tonnes of waste shall be stored on site at any one time. The total amount of hazardous waste stored on site at any one time shall not exceed 50 tonnes. No more than a total of 10 tonnes of whole end of life tyres shall be stored at any time. No more than a total of 10 tonnes of waste batteries shall be stored at any one time.

Table S1.1 activities – HWRC		
Activity reference	**Description of specified activity and WFD Annex I and II operations**	**Limits of specified activity and waste types**
		WEEE Waste WEEE waste shall be clearly identified and segregated. WEEE that may be reused as whole appliances, or that may have components recovered from them for reuse, shall be stored under weatherproof covering to prevent the ingress of water. WEEE containing hazardous material or fluids shall be stored under weatherproof covering where this is necessary to prevent pollution of surface water. Small mixed WEEE shall not be compacted or compressed during storage and preparation for transport. Fluorescent lamps must be stored in rigid, leakproof and weatherproof containers that do not distort or flex when being moved. Waste Temperature Exchange Equipment (WTEE) shall be stored and handled in a way that protects and prevents damage to cooling circuits, compressors, the appliance casing and foam insulation. WTEE shall not be tipped and shall not be stacked or stored more than 3.6m high. **Batteries** Batteries shall be: • clearly identified and segregated from other wastes; and • stored in secure weatherproof containers that are leak-proof. Containers must be closed or stored under weatherproof covering to prevent the accumulation of rainwater. Lead acid batteries shall be stored upright in containers with an impermeable, acid-resistant base. Lithium-ion batteries that are stored either separately, or as mixed batteries, must be marked as a fire hazard and stored accordingly. **Asbestos** Asbestos wastes shall not be: • removed from its primary packaging (bags or wrapping) • stored loose or in bays • transferred between different bulk containers • moved using mechanical equipment, for example loading shovels, chutes and conveyors Asbestos waste shall be: • double bagged, or securely wrapped • kept within clearly identified, segregated, sealed, secure, lockable bulk containers

Table S1.1 activities – HWRC		
Activity reference	**Description of specified activity and WFD Annex I and II operations**	**Limits of specified activity and waste types**
		Bulk containers containing asbestos shall be locked when not being loaded and shall not be stacked. **Pressurised containers containing gases** (aerosols, cannisters and gas cylinders) Pressurised containers containing gases shall be: • clearly identified and segregated from other wastes; • segregated so that those that have flammable contents are stored in separate cages to those with oxidising contents; • stored in secure storage cages constructed of non-combustible materials; • stored in well ventilated areas that are locked when not in use; and • shaded against direct sunlight; and • stored in a manner that prevents the inadvertent discharge of their contents. Gas cylinders shall not be stacked and shall be: • stored upright with seals and protection caps in place where provided; and • be segregated so that non-waste gas cylinders are clearly identified and stored separately from waste gas cylinders. **Household chemicals** Household chemicals shall be • securely stored within clearly identified containers or demarcated areas which are locked when not being used; and • stored in a manner that prevents incompatible wastes coming into contact with each other. **Food waste** Food Waste shall be: • clearly identified and segregated from other wastes within a dedicated reception, storage, and handling area designed so that it can be easily cleared and cleaned; • stored in either within an enclosed building, or within rigid sealed containers, sealed skips or sealed bulk trailers; Food reception, storage, and handling areas shall be cleaned at least weekly. All spillages of food waste shall be cleaned up as soon as practicable and in any event within an hour of them occurring.

Table S1.2 Operating techniques		
Description	**Parts**	**Date Received**
Non-hazardous and inert waste: appropriate measures for permitted facilities Version published 12 July 2021 Updated 1 August 2023	All relevant parts of the non-hazardous and inert waste: appropriate measures for permitted facilities guidance shall apply.	N/A
Waste temperature exchange equipment: appropriate measures for permitted facilities Version published 13 July 2022 Updated 13 July 2022	All relevant parts of the waste temperature exchange equipment: appropriate measures for permitted facilities guidance shall apply.	N/A
Waste electrical and electronic equipment (WEEE): appropriate measures for permitted facilities Version published 13 July 2022 Updated 13 July 2022	All relevant parts of the waste electrical and electronic equipment (WEEE): appropriate measures for permitted facilities guidance shall apply.	N/A

Table S1.3 Pre-operational measures for future development		
Reference	**Operation**	**Pre-operational measures**
PO1	Recommencement of activities in table S1.1	Prior to the recommencement of any activities authorised by Table S1.1, including any waste acceptance, storage and treatment which are in temporary cessation[1] under this variation notice, the operator shall apply to the Environment Agency to vary the permit and provide supporting documents in accordance with the requirements of the Non-hazardous and Inert Waste: appropriate measures for permitted facilities, WEEE: appropriate measures for permitted facilities, Waste temperature exchange equipment: appropriate measures for permitted facilities, and other appropriate measures guidance as applicable. The activities permitted shall only recommence once the permit variation has been issued by the Environment Agency.
Note 1: In accordance with our Charging Scheme any reduction in subsistence fees due to a site being accepted by the Environment Agency as in temporary cessation (where activities have ceased for a period exceeding 12 months) is temporary and limited to a maximum period of 2 years.		

Schedule 2 – Waste types

Table S2.1 Permitted waste types and quantities for the HWRC	
Maximum quantity	The total quantity of waste accepted at the site for the above activity shall be less than 23,600 tonnes a year.
Exclusions	Wastes having any of the following characteristics shall not be accepted: • Consisting solely or mainly of dusts, powders or loose fibres
Waste code	Description
13	**Oil wastes and wastes of liquid fuels**
13 02	**waste engine, gear and lubricating oils**
13 02 06*	synthetic engine, gear and lubricating oils
13 02 07*	readily biodegradable engine, gear and lubricating oils
16	**Wastes not otherwise specified in the list**
16 01	**end-of-life vehicles from different means of transport (including off-road machinery) and wastes from dismantling of end-of-life vehicles and vehicle maintenance (except 13, 14, 16 06 and 16 08)**
16 01 03	end-of-life tyres
16 05	**gases in pressure containers and discarded chemicals**
16 05 05	gases in pressure containers other than those mentioned in 16 05 04
20	**Municipal wastes (household waste and similar commercial, industrial and institutional wastes) including separately collected fractions**
20 01	**separately collected fractions (except 15 01)**
20 01 02	Glass
20 01 08	biodegradable kitchen and canteen waste
20 01 10	clothes
20 01 11	textiles
20 01 13*	solvents
20 01 14*	Acids
20 01 15*	alkalines
20 01 17*	photochemicals
20 01 19*	pesticides
20 01 21*	fluorescent tubes and other mercury containing waste
20 01 23*	discarded equipment containing chlorofluorocarbons
20 01 25	edible oil and fat
20 01 26*	oil and fat other than those mentioned in 20 01 25
20 01 27*	paint, inks, adhesives and resins containing dangerous substances
20 01 28	paint, inks, adhesives and resins other than those mentioned in
20 01 29*	detergents containing dangerous substances
20 01 30	detergents other than those mentioned in 20 01 29
20 01 33*	batteries and accumulators included in 16 06 01, 16 06 02 or 16 06 03 and unsorted batteries and accumulators containing these batteries

20 01 34	batteries and accumulators other than those mentioned in 20 01 33 excluding li-ion traction batteries
20 01 35*	discarded electrical and electronic equipment other than those mentioned in 20 01 21 and 20 01 23 containing hazardous components
20 01 36	discarded electrical and electronic equipment other than those mentioned in 20 01 21, 20 01 23 and 20 01 35
20 01 37*	wood containing dangerous substances
20 01 38	wood other than that mentioned in 20 01 37
20 01 39	plastics
20 01 40	metals
20 01 41	wastes from chimney sweepings
20 02	**garden and park wastes (including cemetery waste)**
20 02 01	biodegradable waste
20 02 02	soil and stones
20 02 03	other non-biodegradable wastes
20 03	**other municipal wastes**
20 03 01	mixed municipal waste
20 03 07	bulky waste

Schedule 3 – Emissions and monitoring

There are no emission limits or associated monitoring requirements.

Schedule 4 – Reporting

There is no reporting under this schedule.

Schedule 5 – Notification

These pages outline the information that the operator must provide.

Units of measurement used in information supplied under Part A and B requirements shall be appropriate to the circumstances of the emission. Where appropriate, a comparison should be made of actual emissions and authorised emission limits.

If any information is considered commercially confidential, it should be separated from non-confidential information, supplied on a separate sheet and accompanied by an application for commercial confidentiality under the provisions of the EP Regulations.

Part A

Permit Number	
Name of operator	
Location of Facility	
Time and date of the detection	

(a) Notification requirements for any malfunction, breakdown or failure of equipment or techniques, accident, or emission of a substance not controlled by an emission limit which has caused, is causing or may cause significant pollution	
To be notified within 24 hours of detection	
Date and time of the event	
Reference or description of the location of the event	
Description of where any release into the environment took place	
Substances(s) potentially released	
Best estimate of the quantity or rate of release of substances	
Measures taken, or intended to be taken, to stop any emission	
Description of the failure or accident.	

(b) Notification requirements for the breach of a limit	
To be notified within 24 hours of detection unless otherwise specified below	
Emission point reference/ source	
Parameter(s)	
Limit	
Measured value and uncertainty	
Date and time of monitoring	

(b) Notification requirements for the breach of a limit	
To be notified within 24 hours of detection unless otherwise specified below	
Measures taken, or intended to be taken, to stop the emission	

Time periods for notification following detection of a breach of a limit	
Parameter	**Notification period**

(c) Notification requirements for the detection of any significant adverse environmental effect	
To be notified within 24 hours of detection	
Description of where the effect on the environment was detected	
Substances(s) detected	
Concentrations of substances detected	
Date of monitoring/sampling	

Part B – to be submitted as soon as practicable

Any more accurate information on the matters for notification under Part A.	
Measures taken, or intended to be taken, to prevent a recurrence of the incident	
Measures taken, or intended to be taken, to rectify, limit or prevent any pollution of the environment which has been or may be caused by the emission	
The dates of any unauthorised emissions from the facility in the preceding 24 months.

Schedule 6 – Interpretation

“accident” means an accident that may result in pollution.

“Annex I” means Annex I to the Waste Framework Directive.

“Annex II” means Annex II to the Waste Framework Directive.

“application” means the application for this permit, together with any additional information supplied by the operator as part of the application and any response to a notice served under Schedule 5 to the EP Regulations.

“authorised officer” means any person authorised by the Environment Agency under section 108(1) of The Environment Act 1995 to exercise, in accordance with the terms of any such authorisation, any power specified in section 108(4) of that Act.

“building” means a construction that has the objective of providing sheltering cover and minimising emissions of noise, particulate matter, odour and litter.

“D” means a disposal operation provided for in Annex I to the Waste Framework Directive.

“emissions of substances not controlled by emission limits” means emissions of substances to air, water or land from the activities, either from the emission points specified in schedule 3 or from other localised or diffuse sources, which are not controlled by an emission or background concentration limit.

‘‘enclosed building’ means a construction designed to provide sheltering cover and minimise emissions of noise, particulate matter, odour and litter. It must be enclosed on all sides and doorways must be as small as practicable.

“EP Regulations” means The Environmental Permitting (England and Wales) Regulations SI 2016 No.1154 and words and expressions used in this permit which are also used in the Regulations have the same meanings as in those Regulations.

“groundwater” means all water, which is below the surface of the ground in the saturation zone and in direct contact with the ground or subsoil.

“Hazardous property” has the meaning in Annex lll of the Waste Framework Directive.

‘’Impermeable surface” means a surface or pavement constructed and maintained to a standard sufficient to prevent the transmission of liquids beyond the pavement surface and should be read in conjunction with the term “sealed drainage system” (below).

“Hazardous waste” has the meaning given in the Hazardous Waste (England and Wales) Regulations 2005.

“List of Wastes” means the list of wastes established by Commission Decision 2000/532/EC replacing Decision 94/3/EC establishing a list of wastes pursuant to Article 1(a) of Council Directive 75/442/EEC on waste and Council Decision 94/904/EC establishing a list of hazardous waste pursuant to Article 1(4) of Council Directive 91/689/EEC on hazardous waste.

‘’Manual’ means sorting and separation of waste by hand, including use of a grab or machine bucket to move the waste.

‘’Manual’ sorting and separation of batteries and WEEE means hand sorting and separation of wastes only.

“pests” means birds, vermin and insects.

“quarter” means a calendar year quarter commencing on 1 January, 1 April, 1 July or 1 October.

“R” means a recovery operation provided for in Annex II to the Waste Framework Directive.

“Sealed drainage system” in relation to an impermeable surface, means a drainage system with impermeable components which does not leak and which will ensure that:

- no liquids will run off the surface otherwise than via the system

- except where they may lawfully be discharged to foul sewer, all liquids entering the system are collected in a sealed sump.

“Waste code” means the six digit code referable to a type of waste in accordance with the List of Wastes and in relation to hazardous waste, includes the asterisk.

“Waste Framework Directive” or “WFD” means Waste Framework Directive 2008/98/EC of the European Parliament and of the Council on waste, as read in accordance with Schedule 1A to the Environmental Permitting (England and Wales) Regulations 2016.

“year” means calendar year ending 31 December.

“hazardous substance” means a substance classified as hazardous as a consequence of fulfilling the criteria laid down in parts 2 to 5 of Annex I to Regulation (EC) No 1272/2008.

“heavy metal” means any compound of antimony, arsenic, cadmium, chromium (VI), copper, lead, mercury, nickel, selenium, tellurium, thallium and tin, as well as these materials in metallic form, as far as these are classified as hazardous substances.
