CONTROL OF POLLUTION ACT 1974

WASTE DISPOSAL LICENCE

1. The Waste Regulation Authority hereby grant a Waste Disposal Licence to
Porter Metals and Skip Hire of 28 Main Road, Christian Malford,
Chippenham, Wiltshire

for land occupied at 28 Main Road, Christian Malford, Chippenham, Wiltshire

subject to the conditions listed overleaf.

2. This licence is issued in accordance with Part 1 of the Control of Pollution Act 1974. The licence holder must ensure that all other relevant legislation is complied with. Attention is particularly draw to the Health and Safety at Work etc. Act 1974, the Radioactive Substances Act 1960 and planning, water protection and environmental health legislation.

NOTES

Rights of Appeal

If a licence holder is aggrieved by the decision of the Waste Regulation Authority in granting a licence subject to conditions he may appeal to the Secretary of State in accordance with Section 10 of the Control of Pollution Act 1974. Appeals must be notified within 6 months of the date of this licence to The Secretary of State, Department of the Environment, Waste Disposal Division, Queen Anne's Chambers, 28 Broadway, London SW1H 9JU. The Secretary of State has power to allow a longer period for the giving of notice of an appeal, but he will not normally be prepared to exercise this power unless there are special circumstances which excuse the delay in giving notice of an appeal.

Dated this 27th day of May 1993

Signed

Authorised Officer

means where hedgerows do not provide an effective barrier. Any new fencing and gates provided shall be not less than 1.8m high, gates shall be locked at all times when the site is not manned.

5. A site identification board of durable material and finish shall be maintained at the site entrance, showing the hours when the site is open and giving the name of the site, the names, address and telephone number of the licence holder and the telephone number of the Waste Regulation Authority.
6. Only solid waste shall be stored on areas constructed from clean hardcore or other suitable material. The surface of these areas shall be well consolidated and not promote either the accumulation of surface water or the formation of mud. These storage areas shall be identified on the working plan.
7. Any area used for the storage and dismantling of waste containing oils, antifreeze, and petrol shall be of an impervious hard surface and banded to contain any spillage. Surface water which may accumulate shall discharge into a contained collection system to be approved by the Waste Regulation Authority.
8. Where necessary wheel cleaning facilities of a specification to be detailed in the working plan shall be provided to prevent the deposit of mud, oil, or other debris on the public highway.
9. A site control office shall be provided as shown on the working plan and a copy of this licence displayed.
10. A maximum height for the storage of waste within the site shall be determined by clear markers provided around the site and shown on the working plan. Waste in excess of the height of these markers shall be removed immediately.
11. No waste shall be deposited nor any plant or equipment shall be used for the purpose of disposing of waste or dealing with waste if any equipment or structure is not in an effective condition.
12. Lighting if necessary shall be provided and used to facilitate operations during the hours of darkness.
13. Any pressurised gas holders found amongst the waste or received as a consignment for use shall be stored in a secure designated area sited in the open and away from existing buildings or plant. When in use they shall be transported around the site in an upright position on a wheeled trolley.

Operational Conditions

14. Hours of Working
Wastes shall only be deposited and plant and equipment used for the processing or sorting of waste within the following

times.

Mondays to Saturdays
Sundays

7.30 am and 5.30 pm
7.30 and 12 noon

15. The site shall be manned during all operating hours and the person nominated to have responsibility of the site shall be capable of ensuring compliance with the licence and its conditions.
16. The walls or fence and gates shall be inspected weekly and any defect shall be made good immediately to ensure complete security of the site.
17. Any spillage of liquids arising from dismantling of vehicles or other parts shall be dealt with immediately and the licence holder shall provide a quantity of absorbent material to hand for any such spillage.
18. No waste shall be burnt within the boundaries of the site, and a fire at the site shall be regarded as an emergency and immediate action shall be taken to extinguish it. All outbreaks of fire shall be notified forthwith to the Waste Regulation Authority.
19. Precautions shall be taken to deal effectively with any vermin and insects on site.
20. Any proposed change in the working plan shall be notified in writing to the Waste Regulation Authority at least one month before the proposed change is implemented. The change may not be implemented until approval has been received by the licence holder from the Waste Regulation Authority.
21. A record of defects of the site shall be kept by the person nominated as responsible for the site and what action was taken to rectify such defects. This record shall be made available to any inspecting Officer from the Waste Regulation Authority.
22. A record of the types and quantities of waste delivered to and removed from the site each week shall be kept in the Site Office and shall be made available if requested to the inspecting Officer from the Waste Regulation Authority.
23. The site, including its access and its immediate environs shall be kept clean and tidy.
24. All recoverable oils shall be removed from scrap which is controlled waste and deposited into reception tanks as soon as possible after arrival on site in a manner to avoid spillage.
25. All containers used to store liquids shall be properly labelled to show their contents and be store in proper bunded areas capable of holding 110% of the capacity of the containers.

26. All batteries shall be handled in such a manner that they are not damaged and their contents are not spilled or otherwise allowed to escape from the casing. They shall be stored in the approved area as shown on the working plan.
 27. Solid waste produced at the site for disposal elsewhere shall only be stored in the area shown on the working plan. Any skips stored in this area shall be removed as soon as they are full and only the number of skips as shown on the plan shall be stored at any one time.
 28. The licence holder shall take all reasonable measures to minimise the noise levels caused by the operation of the site and the handling and transport of the waste and containers.
 29. All necessary precautions shall be taken to ensure that the presence of any waste does not give rise of an offensive odour emission. Should any such emission give rise to complaint the licence holder shall take such action as is necessary to eliminate the nuisance.
 30. All loose waste which may be lying on the site shall be picked up at least weekly and either stored or disposed of in order to keep the site tidy. Any escape of windblown material out of the site shall be collected immediately and action taken to prevent further escape.
 31. The licence holder shall ensure as far as is reasonable practicable that all vehicles leaving the site shall have their loads secure and sheeted down so as to prevent spillage of waste material.
 32. All necessary precautions shall be taken to ensure that scrap and other waste is stored in a safe manner to ensure public safety. Scrap vehicles shall not be stored above the height of the marker provided on the site.
 33. Tyres, either on wheels or removed from vehicles shall be stored in a clearly defined area as shown on the working plan.
 34. Metal swarf containing cutting oils shall be stored on a bunded impervious area so that it will drain to a sealed containment tank as shown on the working plan.
 35. Any waste liable to contain polychlorinated bi-phenyls such as transformers and capacitors unless there is evidence in writing to the contrary shall not be crushed, drained, broken up, or flushed or dealt with in any way. The Waste Regulation Authority shall be notified immediately and the waste stored in a secure designated area until instruction has been given in writing by the Waste Regulation Authority as to its disposal. All fire fighting equipment necessary to deal with leaking capacitors shall always be to hand.
- Any spillage shall be notified to the Waste Regulation Authority and the National Rivers Authority immediately.

36. Any pressurised gas holders found amongst the waste or received as a consignment for use shall be stored in a secure designated area or building when the site is not in use or the site not manned. When in use they shall be transported around the site in an upright position on a wheeled trolley.
37. In the event of the amount, quality or properties of any leachate or drainage on or from the site proving unsatisfactory at any time provision shall be made for collection and removal or treatment of the offending liquid.
38. The licence holder is responsible for ensuring that any necessary arrangements are made for compliance with all the conditions hereto, particularly in so far as compliance with any of the conditions will or may affect the rights or interest of any other person or other properties.
