

OUTGOING

PERMIT

On 1 April 1996 this document shall have effect as if it were a Waste Management Licence. Prior to that date, any reference to the word "licence" shall be taken to mean a resolution passed in accordance with Section 11 of the Control of Pollution Act 1974. Also until 1 April 1996, any reference to the word "licence holder" shall mean the West Yorkshire Waste Management Joint Committee.

LICENCE NO 1633

**LEEDS BULK TRANSFER STATION &
MATERIALS RECLAMATION FACILITY
EVANSTON AVENUE, LEEDS**

NGR SE 274 343

CONDITIONS

GENERAL

1. This licence relates to the area as shown edged red on the attached plan No. T/301/SLI.
2. The licence holder shall operate the site in accordance with the plans (No.s T/301/SLI and T/301/21) and details (ref.WY 148/WP/TLS and WY 148/WP/MRF) together with the Additional Information Sheets attached to this licence and in accordance with the following conditions which shall in all cases take precedence.
3. The licence holder shall notify the Waste Regulation Authority, hereinafter called the Authority, in writing of any proposed change in the conduct of operations, as detailed in condition 2, at least one month before the proposed change is implemented. The proposed change shall not be implemented if within one month from the date of receipt of the notification, the Authority declines, in writing, to accept the proposed change.
4. By 1 June 1996 the working plan shall be updated, as may be necessary, with a consolidated working statement and as built plans showing any site development that has taken place since the licence application was submitted.
5. Waste transfer and materials reclamation operations shall be limited to inside the buildings as shown on the attached plan No. T/301/010C.
6. The Authority shall be informed immediately, in writing, of any proposed or actual change in the status of the licence holder which could have a material effect on the licence e.g. the name of the holder, bankruptcy / appointment of an administrative receiver / company liquidation.

PERMITTED WASTE TYPES & QUANTITIES

7. Subject to condition 8 below the types and quantities of waste accepted at the site shall be as described in the attached schedule ref. WS 1633/2.

8. No wastes which are poisonous, noxious or polluting or the presence of which on land is likely to give rise to an environmental hazard shall be accepted at the site except as described on the attached schedule. Any such waste shall be dealt with as specified in the details attached to this licence.
9. The quantity of waste stored on site at any time shall not exceed 2000 tonnes.

SITE INFRASTRUCTURE

10. All construction, surfacing, and other works as described in the plan and details attached to this licence shall be completed before the commencement of waste handling operations on site.
11. The roads from the site entrance to the waste transfer and materials reclamation area shall be maintained. The roads shall have hard surfaces and be drained to prevent accumulations of mud, stone or other material adhering to the wheels of vehicles leaving the site.
12. Adequate waiting and unloading space shall be provided within the site.
13. Within two months of the date of commencement of operations under this licence, a site identification board of durable materials and finish shall be displayed and maintained at a suitable point at the site entrance, showing:
 - (a) the licence number,
 - (b) the name and address and telephone number of the operator,
 - (c) the name and address and telephone number of the Authority.
14. No waste transfer or materials reclamation operations shall be carried out unless the site has been secured to prevent unauthorised vehicular access.
15. All fences, gates and buildings shall be maintained to ensure the security of the site at all times.
16. All concreted areas shall be repaired or reinstated as necessary to ensure they have an impermeable surface.
17. All tarmac/hard standing areas shall be maintained.
18. All drainage works, mechanical waste handling equipment, dust extraction apparatus and any other ancillary equipment shall be maintained in working order.
19. The floors of the transfer station and materials reclamation facility (MRF) buildings, shall be impervious to moisture and capable of being easily cleaned.
20. The drainage of the site shall be as shown on the plans submitted under condition 2 of this licence.
21. Any proposals for amendment to the drainage/surfacing of the site shall be submitted for the prior approval of the Authority.

22. All bulk liquid storage containers used in connection with the operation of the site shall be located within a bund to ensure containment of the liquid if for any reason leakage occurs. The floor and walls of the bund shall be watertight and capable of holding 110% of the capacity of the container. All pipework and the outlet valve shall be contained within the bund, and any tap valve shall be so arranged as to discharge vertically downwards and shall be kept locked shut when not in use.
23. All bulk liquid storage containers used in connection with the operation of the site shall be suitably designed and constructed and they shall be maintained to ensure they are leak proof and in working order whenever in use. All containers shall also be suitably labelled to describe their contents and any inappropriate name markings or other identifications shall be obliterated.
24. Any accumulations of water or other liquid within the bund surrounding a bulk liquid storage container shall be removed so as to retain the effectiveness of the bund and the liquid disposed of in a manner as detailed in the working plan.

SITE OPERATIONS - GENERAL

25. Subject to condition 26 below (unless agreed otherwise in writing by the Authority) operating hours for waste transfer and materials reclamation operations shall be 0600 hours to 2400 hours Monday to Saturday inclusive of Bank Holidays and 0800 hours to 1600 hours on Sundays.
26. No waste transfer or materials reclamation operations shall be carried out during the hours covered by official lighting up times (i.e. half-an-hour after sunset to half-an-hour before sunrise) unless lighting is provided.
27. The doors of the transfer station and MRF buildings and the gates at the site entrance shall be kept locked at all times the site is unattended and all precautions shall be taken to prevent unauthorised access to the site.
28. Whenever waste transfer and materials reclamation operations are being carried out the site shall be adequately manned to ensure that waste is handled in compliance with the conditions of this licence.
29. Whenever waste transfer and materials reclamation operations are being carried out the site shall be supervised by a person competent and qualified to ensure that waste is handled in compliance with the conditions of this licence.
30. The terms of the site licence shall be made known to any person who is given responsibility for the management or control of the site and a copy of the licence shall be available on the site/at the control office for the site whenever the site is operational.

SITE OPERATIONS - WASTE HANDLING

31. Each load received shall be inspected to ensure that it conforms to the requirements of the licence.
32. Wastes not conforming to the requirements of the licence shall not be accepted at the site. If the waste is rejected by virtue of condition 8 the Authority shall be informed immediately.
33. Any waste which has been accepted at the site and is subsequently found to be contrary to condition 8 of this licence, shall be placed in a secure storage area within the site and the Authority informed immediately.
34. The Authority shall be given not less than 24 hours notice of the proposed method of dealing with any waste as described in condition 33. The waste shall be removed from the site within 7 days of the date of its discovery unless agreed otherwise with the Authority.
35. No waste shall be deposited unless the site is equipped with a mechanical shovel (or similar plant) in full working condition.
36. Waste shall not remain on site for longer than as detailed in the working plan. Any change to these details shall not be implemented without the prior written consent of the Authority. The changes shall form part of the working plan once the Authority has given consent to the changes.
37. Waste shall only be stored overnight within the buildings as described in condition 6 except for waste loaded onto vehicles parked within the site.
38. Any items or materials of value recovered from the waste shall be stored in the bunkers as shown on plan No. T/301/010C or in containers and shall at all times be maintained in a tidy condition.

SITE OPERATIONS - ENVIRONMENTAL CONTROL

39. The deposit on the public highway of mud, stone or other materials caused by the operation of the site shall be prevented.
40. At all times the site shall be kept in a tidy condition. Any loose waste which may be lying on the site shall be gathered up and disposed of tidily each day.
41. The walls and floors of all of the waste storage, handling and MRF areas shall be cleaned to remove any accumulation of waste not less frequently than once every 7 days.
42. No materials shall be burned within the boundaries of the site and a fire at the site shall be regarded as an emergency and immediate action shall be taken to extinguish it.

43. The Authority shall be immediately informed of any incident that could give rise to danger to public health, pollution of water, or could be seriously detrimental to local amenity, including any fire.
44. Action shall be taken to deal effectively with any vermin or pests on the site.
45. All necessary action shall be taken to prevent the dissemination of odour, fumes, dust, grit or windblown material.

RECORD KEEPING

46. A record shall be kept of all wastes received and of all the materials (wastes and recovered materials) removed from the site. The records shall include the following for each vehicle load of waste / materials:
 - (a) the origin of the waste by Local Authority District
 - (b) time and date received
 - (c) quantities in tonnes received and waste type – as specified by the Agency
 - (d) time and date removed
 - (e) quantities in tonnes removed and waste type – as specified by the Agency
 - (f) destination of where materials removed to by Local Authority District.
47. A summary of the information provided in condition 46 shall be submitted to the Agency in a format and at the frequency as required by the Agency. This summary shall be submitted within fourteen days of the end of the accounting period specified by the Agency.

FOOTNOTES

Fridges and freezers contain chlorofluorocarbons (CFCs) which are believed to damage the ozone layer and thereby present a threat to human health. The CFC coolant can be recovered from such appliances and reused. This Authority encourages the recycling of CFCs and supports your participation in such a recovery scheme. Further information on the recovery of CFCs can be obtained from the Authority.

OVERHEAD POWER CABLES

The Health and Safety Executive have advised that if overhead power lines cross the site, hazards can arise due to contact with such lines if appropriate precautions are not taken. Guidance on safe practices is contained in the Health and Safety Executive Guidance Note GS6 (obtainable from HMSO) and from the booklet 'Safety Precautions in Connection with Electric Cables' (obtainable from the Federation of Civil Engineering Contractors). The assistance of Yorkshire Electricity can also be obtained when additional advice is required.

OTHER STATUTORY REQUIREMENTS

Licence holders should note that this resolution was issued under Section 11 of the Control of Pollution Act 1974 and it does not provide them with exemption from any other statutory requirements. On 1 April 1996 it will be treated as a waste management licence.

After 1 April 1996 the licence holder may apply to the Authority to have the conditions of this licence modified, pursuant to Section 37 of the Environmental Protection Act 1990.

It should also be noted that even though the licence holder may comply with all the above conditions and any other requirements deemed appropriate, this does not necessarily exclude the licence holder from prosecution should subsequent pollution of the environment occur. **IT IS THE RESPONSIBILITY OF THE LICENCE HOLDER TO PREVENT POLLUTION.**

LICENCE NO. 1633SCHEDULE OF WASTES
AUTHORISED FOR ACCEPTANCE UNDER CONDITION 7REF. NO. WS 1633/2

WASTE TYPE	MAXIMUM DAILY QUANTITY DELIVERED (TONNES)
Household waste (which may include uncontaminated earth and excavation waste, uncontaminated bricks, stone, solid concrete, breeze blocks, building sand, gravel, tiles, other ceramic materials and slate, ash from solid fuel heating, garden waste, general household refuse, domestic appliances and other scrap metal, waste oil and parts from private motor vehicles, empty paint and solvent drums, animal, food and kitchen wastes, dusty wastes from DIY, sweeper waste and gully emptier waste from street cleaning operations.)	1300
General skip waste	400
Commercial and industrial waste	450
Construction, demolition and excavation waste	200
Category 'E' clinical waste	2.0

MAXIMUM ANNUAL QUANTITY OF WASTE ACCEPTED**400 000 TONNES**
