Introductory note

This introductory note does not form a part of the notice.

The main features of the permit are as follows: To operate a household, commercial and industrial waste transfer station that will be used for the importation, storing, handling, crushing, shredding, screening, or sorting of inert and non-hazardous household or commercial waste to produce a Solid Recovered Fuel (SRF) to CEN/TC343 standard. Wastes which are unsuitable for the production of SRF will be processed and sent for recycling or further processing.

This permit has been varied from SR2008No3 to a bespoke permit to allow the acceptance of waste falling under EWC code 191212. The site operations and capacity remains the same. A bespoke permit has now been issued.

Permitted wastes do not include hazardous wastes. This permit does not permit the burning of any wastes, either in the open, inside buildings or in any form of incinerator.

This Permit does not allow any point source emission into surface waters or groundwater. However, under the emissions of substances not controlled by emission limits rule:

- Liquids may be discharged into a foul sewer subject to a consent issued by the local water company.
- Liquids may be taken off-site in a tanker for disposal or recovery.
- Clean surface water from roofs, or from areas of the site that are not being used in connection with storing and treating waste, may be discharged directly to surface waters, or to groundwater by seepage through the soil via a soakaway.

The status log of the permit sets out the permitting history, including any changes to the permit reference number.
