- iii) As far as is reasonably practicable, the treatment facilities shall be operated so as to prevent:
 - a) any matter being present in the discharge other than matter specifically covered by numerical conditions in this consent, to such an extent as to cause the receiving waters, or any waters of which the receiving waters are a tributary, to be poisonous or injurious to fish in those waters, or to the spawning grounds, spawn or food of fish in those waters, or otherwise cause damage to the ecology of those waters; and
 - b) the discharge from having any other adverse environmental impact.

3. OUTLET AND LOCATION

The discharge shall be made at the place specified as:

The discharger shall ensure that all constituents of the discharge pass through the said sampling point at all times and in any legal proceedings it shall, for the purposes of Section 10 of the Rivers (Prevention of Pollution) Act 1961, be presumed, until the contrary is shown that any sample of the discharge taken at the said sampling point is a sample of what was discharging into controlled waters.

5. VOLUME AND RATE OF DISCHARGE

- a) The volume of the discharge shall not exceed 500 cubic metre in any period of 24 hours
- b) The rate of discharge shall not exceed 14 litres per second.

Dear Mr Bratherton

**WATER RESOURCES ACT 1991 SCHEDULE 10

Thank you for your letter received on 28 January 1998 regarding the outfall location at Haggerston Caravan Park.

I can confirm that the Environment Agency has no objection, in principle, to the revised outfall locations as shown on Drawing No. 853/13/1 attached to your letter. An amended plan and schedule (giving the new National Grid Reference of the outfall) will then be sent to you for insertion into the consent document.

If you require any further information or clarification please contact me.

Yours sincerely
