The following notes should not be deemed to be part of the above consent and are for information purposes only.

1. The Consent hereby granted is personal to the applicant only and upon any transfer or conveyance of the property to which it relates the person to whom the property is transferred or conveyed should make application for consent to discharge from the soakaway serving the property in accordance with Section 72 of the above Act.
2. Without prejudice to the generality of Section 74 of the above mentioned Act it should be noted that when the Authority, or its Agents, construct and lay a public foul water sewer in the area the Authority will exercise its powers under that Section to revoke this Consent in order that the trade effluent from the building shall be connected thereto.
3. The issuing of this Consent does not imply the suitability of the sub-strata for the effective disposal of the discharge.
4. This document does not authorise the making of a discharge to a stream, ditch or other watercourse. Any such discharge requires a separate consent under the Rivers (Prevention of Pollution) Acts 1951-61 and, if made without such consent, could result in prosecution.
