Introductory note

This introductory note does not form a part of the notice

The following notice gives notice of the variation of an environmental permit.

Higher Southcombe Farm Pig Unit is permitted to stock 2,000 breeding sow places. The variation is to increase the existing installation boundary eastwards to allow space for a new covered slurry store. The existing slurry store will be used with a floating cover, in contingency, if the new slurry store is overwhelmed. Old Slurry Store 2 (marked as a whey store on site plans) will be converted to a dirty water store. There will be no increase in the stocking numbers, and no other changes to the permit.

The schedules specify the changes made to the original permit.

The status log of a permit sets out the permitting history, including any changes to the permit reference number.
