

Notice of variation with introductory note

Environmental Permitting (England & Wales) Regulations 2010

Tradebe Solvent Recycling Limited

Morecambe Solvent Management
Middleton Road
Morecambe
Lancashire
LA3 3JW

Variation application number
EPR/BL7302ID/V004

Permit number
EPR/BL7302ID

Morecambe Solvent Management

Permit number EPR/BL7302ID

Introductory note

This introductory note does not form a part of the notice

The following notice gives notice of the variation of an environmental permit.

Schedule 1 to the Environmental Permitting Regulations has been updated by the Environmental Permitting (England and Wales) (Amendment) Regulations 2013 to reflect the implementation of the Industrial Emissions Directive into England and Wales. This variation implements the changes made to Schedule 1 of the Regulations into Table 1.1.1 of the permit. Table 1.1.1 specifies the activities authorised by the permit.

The schedules to this variation specify the changes made to the original permit.

The status log of a permit sets out the permitting history, including any changes to the permit reference number.

Status log of the permit		
Description	Date	Comments
Application BL7302ID received (EPR reference EPR/BL7302ID/A001)	31/03/05	
Additional information requested (Schedule 4 Notice)	09/08/05	Response received 14/10/05
Additional information received (Acceptable Waste Categories)	25/11/05	
Additional information received (Specification of all fuel and wastes)	14/12/05	
Permit determined (EPR reference EPR/BL7302ID/A001)	21/12/05	Original permit issued to Solvent Resource Management Limited
Application reference EPR/BL7302ID/V002 – variation	27/05/08	
Additional information requested (Schedule 5 Notice)	19/08/08	Response received 05/09/08
Variation EPR/BL7302ID/V002 determined (PAS reference PP3331XX)	17/09/08	
Notified of change of company name and registered office address	19/12/11	Name changed to Tradebe Solvent Recycling Limited and change of registered office address
Variation issued EPR/BL7302ID/V003	16/02/12	Varied permit issued to Tradebe Solvent Recycling Limited
Agency variation determined EPR/BL7302ID/V004	06/05/14	Agency variation to implement the changes introduced by IED

End of introductory note

Notice of variation

Environmental Permitting (England and Wales) Regulations 2010

The Environment Agency in exercise of its powers under regulation 20 of the Environmental Permitting (England and Wales) Regulations 2010 varies

Permit number
EPR/BL7302ID

issued to:
Tradebe Solvent Recycling Limited ("the operator")

whose registered office is

Whittle Close Engineer Park
Sandycroft
Deeside
Flintshire
Wales
CH5 2QE

company registration number **03890526**

to operate a regulated facility

Morecambe Solvent Management
Middleton Road
Morecambe
Lancashire
LA3 3JW

to the extent set out in the schedules.

The notice shall take effect from 06/05/2014

Name	Date
Damien Matthias	06 May 2014

Authorised on behalf of the Environment Agency

Schedule 1 – conditions to be deleted

None

Schedule 2 – conditions to be amended

The following conditions are amended as detailed, following an Environment Agency initiated variation

- Table 1.1.1 is amended to reflect the changes to Schedule 1 of the Environmental Permitting Regulations introduced by the Industrial Emissions Directive. The table now reads:

Table 1.1.1 activities		
Activity listed in Schedule 1 of the EP Regulations	Description of specified activity and WFD Annex I and II operations	Limits of specified activity and waste types
S5.3 A(1)(a)(v) Disposal or recovery of hazardous waste with a capacity exceeding 10 tonnes per day involving solvent reclamation or regeneration;	Operation of the kettle, reboiler heat exchanger, distillation column and vent condenser, feed and product tanks. R2 Solvent reclamation / regeneration	From the receipt of material for processing, through the distillation and separation processes to transfer or separated materials to storage or disposal.
S5.1 A(1)(a) The incineration of hazardous waste in a waste incineration plant or waste co-incineration plant with a capacity exceeding 10 tonnes per day.	Production of steam for use in distillation process, in a boiler with rated thermal input of 3.8MW. D10 Incineration on land R1 Use principally as a fuel or other means to generate energy	Co-incineration of waste, from the evaluation and receipt of waste fuel, through to storage, on-site pre-treatment facilities, waste systems, fuel systems, air supply systems, boiler, stack devices and systems for controlling incineration operations, recording and monitoring incineration conditions.
S5.3 A(1)(a)(ii) Disposal or recovery of hazardous waste with a capacity exceeding 10 tonnes per day involving physico-chemical treatment;	Operation of a recovery plant for waste oil. R3 Recycling / reclamation of organic substances which are not used as solvents	From receipt of waste materials, through sorting, size reduction, separation of components.
S5.3 A(1)(a)(iii) Disposal or recovery of hazardous waste with a capacity exceeding 10 tonnes per day involving blending or mixing	Formulation of Secondary Liquid Fuel by blending process residues with waste materials. D13 Blending or mixing prior to submission to any of the operations numbered D01 to D12 R3 Recycling / reclamation of organic substances which are not used as solvents	From receipt of waste materials, through sorting, separation of components, to blending and despatch of product.

Table 1.1.1 activities

Activity listed in Schedule 1 of the EP Regulations	Description of specified activity and WFD Annex I and II operations	Limits of specified activity and waste types
S5.3 A(1)(a)(ii) Disposal or recovery of hazardous waste with a capacity exceeding 10 tonnes per day involving physico-chemical treatment;	Recovery plant for waste oil filters. R3 Recycling / reclamation of organic substances which are not used as solvents R4 Recycling / reclamation of metals and metal compounds	From receipt of waste materials, through sorting, size reduction, separation of components.
S5.6 A(1)(a) Temporary storage of hazardous waste with a total capacity exceeding 50 tonnes	Operation of a waste transfer station for the storage of hazardous waste prior to removal off site for disposal. Storage of hazardous waste prior to and after any of the listed activities above. D15 Storage pending any of the operations numbered D01 to D14 R13 Storage of wastes pending any of the operations numbered R01 to R12	From receipt of waste materials to storage of separated components for recycling and despatch of product & materials for disposal or further recovery. Maximum storage of 1,000 drums in the transfer station at any one time, prior to removal off site for disposal.
Directly Associated Activity		
Fuel combustion	Combustion of fuel in a boiler with a rated thermal input of 3.8MW for the production of steam for use in the distillation process. (Boiler is a standby boiler for the main site).	From receipt and storage of raw materials, through to burning of fuel and disposal/recovery of any waste.
Solvent handling and storage	Handling and storage of recovered (product) solvents.	From transfer from distillation until to tank farm, through subsequent blending to loading of road tankers, IBC's or drums from tank farm or distillation unit.
Waste handling and storage	Handling and storage of wastes for disposal.	From the production of waste materials through to storage of waste, including contaminated materials.
Air emissions abatement	Abatement of air emissions.	Abatement equipment for Drum Handling Plant 1 (DHP 1) – water scrubber. Abatement equipment for Drum Handling Plant 1 (DHP 2) – carbon bed adsorption column.

Schedule 3 – conditions to be added

None
