### Introductory note

#### **This introductory note does not form a part of the notice.**

The following notice gives notice of the transfer of an environmental permit to a new operator (the transferee).

This notice transfers the permit in full from British Steel Limited to Jingye Steel (UK) Limited. The function and management of the facility will remain unchanged.

The installation boundary has been reduced in size due to an Environment Agency decision to partially revoke two areas of the permit. The areas of land have not been used as part of this installation, and these changes clearly distinguishes this installation from the adjacent landfill and waste water treatment works (WWTW). These changes prevent any activities from this installation taking place on the landfill or the WWTW sites. We are satisfied that there is no pollution risk from any activities in these areas undertaken under this permit.

Any changes made as a result of the transfer are set out in the schedules.

The status log of a permit sets out the permitting history, including any changes to the permit reference number.
