DORSET County Council

WASTE MANAGEMENT LICENCE No. WML/287

In persuance of their powers under the Environmental Protection Act 1990 DORSET COUNTY COUNCIL, being the Waste Regulation Authority for the County, HEREBY GRANT A WASTE MANAGEMENT LICENCE to:

Weymouth & Sherborne Recycling
50 Legion Road
Hamworthy
POOLE
Dorset
BH15 4EX

for the facility described below in accordance with the details given in application form No. R29/49 and subject to the Forty Two conditions which are attached.

Facility: Bulky Household Waste Site

Location: Brook Road, Wimborne

National Grid Reference: SZ 023 992

Signed: For County Surveyor

Date: 18.1.95.

IMPORTANT NOTES:

1. The activities to which this licence relates shall not be carried on as to cause pollution of the environment or harm to human health or become seriously detrimental to the amenities of the locality. "Pollution" and "Harm" are defined in Section 29 of the Environmental Protection Act 1990.

2. The issue of this licence does not affect in any way the licence holder's Statutory Obligation under other legislation (in particular those set out in the Health & Safety, Radioactive Substances, Planning, Water Protection and Environmental Health legislation) and offences under such legislation would render the licence holder liable to prosecution.

1. General

1.1 This licence relates only to that area hatched black on the attached plan.

1.2 Any approvals, authorisations or agreements required by this licence shall only be given in writing by the Waste Regulation Authority. Notifications required by this licence shall be given in writing by the licence holder.

1.3 The terms of this licence and the details set in the Working Plan shall be made known to any person who is involved in the operation of the site. Copies of these documents shall be displayed at the site office or at locations(s) agreed with the Waste Regulation Authority.

1.4 The site shall be staffed by suitably trained persons and supervised by a Technically Competent Person to ensure that all the operations and activities carried out at this site comply with the conditions set out in this licence. No waste shall be deposited at the site unless the operations are supervised by a Technically Competent Person. The licence holder shall provide the Waste Regulation Authority with the name(s), job title(s), responsibilities, details of experience and copies of (P)COTCs of the person(s) they consider to be the Technically Competent Management at the site for approval. The licence holder shall notify the Waste Regulation Authority of any changes in the management at the site within five days.

2. Process and Rates of Process

2.1. This Waste Management Licence authorises the following operations;

2.1.1. Keeping and sorting of waste.

2.2. The maximum quantities of waste that may be handled on site is 10,000 tonnes per annum.

3. Permitted Waste

3.1. The type of waste deposited at the site shall be restricted to the following:

3.1.1. Household Waste (as defined in the Environmental Protection Act 1990, Section 75, paragraph 5(a)) including special waste (as defined by the Control of Pollution (Special Waste) Regulations 1980).

4. Records

4.1. A record of the types and quantities of wastes disposed of at the site shall be kept . The record shall be made available for inspection by the Waste Regulation Authority at any reasonable time and a summary shall be sent to the Waste Regulation Authority on the form attached as Annex A of this licence (or in any other format agreed with the Waste Regulation Authority) on the second Tuesday of every month

4.2. A site diary shall be kept of significant events during the sites operation. Such events shall include details of hazardous wastes delivered, accidents, spillage's, fires on site etc. and the actions taken to deal with their effects. The site diary shall be made available on request to the Waste Regulation Authority for inspection at any reasonable time.

5. Working Plan

5.1. A Working Plan shall be prepared and submitted for consideration to the Waste Regulation Authority within two months of the issue of this licence. Thereafter the Working Plan shall be updated and submitted at a maximum of twelve monthly intervals (or at periods specified by the Waste Regulation Authority) to take into account changes in the site and contemporary waste management practice and advice. Any subsequent amendments to the Working Plan shall be agreed in writing with the Waste Regulation Authority prior to their implementation. All documents and plans submitted as part of the Working Plan shall form part of this licence for the purposes of Section 35 of the Environmental Protection Act 1990.

5.2. The Working Plan shall detail the following:

- 5.2.1. Site Layout including areas provided for skip storage and storage of waste materials intended for recycling
- 5.2.2. Site security measures including fencing, gates and manning arrangements.
- 5.2.3. Methods of handling and storing waste
- 5.2.4. Procedures to deal with special, hazardous and clinical waste and arrangements for recording of deliveries of the same
- 5.2.5. Vermin, litter, smell and noise control measures
- 5.2.6. Emergency measures in the case of fire
- 5.2.7. Any surface water drains or gullies and interception devices prior to discharge
- 5.2.8. Staffing level of the site with details of qualifications and experience of staff, and their responsibilities
- 5.2.9. Procedures in the event of fire
- 5.2.10. The anticipated annual input of waste

6. Hazardous Waste Segregation

6.1. The licence holder shall make arrangements for the segregation and safe storage of any special or hazardous wastes delivered to the site.

6.2. The licence holder shall make arrangements for the segregation and safe storage of any clinical wastes from households and its subsequent collection.

6.3. The licence holder shall provide a written procedure to deal with any of the waste listed in the Conditions 6.1 and 6.2 which shall be included in the Working Plan. These procedures shall be made known to all Site Operatives

6.4. Should any special or hazardous wastes be delivered to the site which have not been deposited in accordance with the above procedures immediate action shall be taken to prevent public access, segregate the waste and to subsequently remove the waste.

6.5. The licence holder shall make arrangements for the segregation and safe storage of waste oil.

7. Site Operation and Supervision

7.1. The site shall only be open during the hours of 8.00 a.m. to 7.00 p.m. or other times as agreed with the Waste Regulation Authority.

7.2. The type and quantity of waste shall not exceed the operatives or plants ability to deal with it.

7.3. All putrescible waste shall be deposited directly into containers.

7.4. Items for reuse or recycling may be deposited on the ground but shall only be stored in the designated areas set out in the Working Plan. Any waste that cannot be placed into a recycling container or bay area shall be put into a general waste skip.

7.5. All skips containing waste shall be stored in the areas designated in the Working Plan.

7.6. Any waste found to be deposited outside the containers or any litter or spillage shall be cleared up as soon as possible and not later than the end of the working day. Litter shall be prevented from clogging drainage channels on site or from leaving the site.

7.7. Containers shall be emptied as soon as possible when they become full and in the case of skips containing putrescible waste they shall be emptied at least once every four days.

7.8. Open topped containers carrying general waste shall be netted or sheeted down once full or prior to removal to prevent waste or litter escaping from them.

7.9. The empty bays shall be cleared of any waste before an empty skip is replaced in the bay.

8. Staffing

8.1. The site shall be staffed sufficiently to ensure compliance with all the conditions of this licence.

8.2. There shall be at least two members of staff on site at any time that the site is open who shall prevent interference with the deposited wastes by any person not authorised by the licence holder.

9. Site Preparation

9.1. The site shall be prepared in accordance with the attached plan. Any amendment to this shall be agreed in writing with the Waste Regulation Authority prior to its implementation.

9.2. Site drainage shall be agreed with the Waste Regulation Authority, if works are required to modify the site drainage these shall be carried out by a date agreed with the Waste Regulation Authority.

9.3. Oil reception tanks shall be provided and surrounded by an impermeable bund sealed to an impermeable base providing a capacity of not less than 110% of the tank it surrounds.

9.4. Waste batteries shall be stored upright in an orderly manner within an impermeable bund sealed to an impermeable base providing a capacity of not less than 110% of the liquid contained within the stored batteries.

9.5. Safety barriers shall be provided at positions where the public will deposit waste into the open topped containers in positions suitable to restrain persons from falling from access areas or ramps.

9.6. A lighting system as detailed in the Working Plan shall be provided to cover all operating areas of the site when the site is to be operated during the hours of darkness.

9.7. A lockable gate and fencing shall be provided at the site to prevent both unauthorised entry and deposit of waste. When the site is not staffed the gates shall be locked.

9.8. A site identification board of durable material and finish shall be erected at the entrance to the site. This shall be maintained in a legible form and shall display the following wording and information:

"Licence Holder's Name:
Waste Management Licence No:
Site Name:
Licence Holders Emergency Contact and Telephone No:

Licensed under the Environmental Protection Act 1990 by Dorset County Council, County Hall, Dorchester (01305) 224002"

9.9 Information and warning boards shall be provided detailing the following;

Opening and closing times
Restrictions on waste types including special, hazardous or clinical wastes from households

These signs shall be maintained in their positions as shown in the Working Plan and in an easily legible condition.

10. Environmental Control

10.1. All plant and equipment used on site shall be silenced to the manufacturers specifications and shall be maintained in good working order with all covers in position so as to keep noise levels to a minimum at all times.

10.2. No plant or equipment shall be used to process the waste without prior written approval of the Waste Regulation Authority.

10.3. Any waste which has spread outside the site boundary shall be collected without delay and any waste deposited outside of the site gates or on the access road shall be removed immediately on opening the site.

10.4. At no time shall any dust be allowed to leave the licensed area, during conditions in which emission of dust is likely the site shall be sprayed with water to spurs dust.

10.5. No waste material shall be burnt within the boundaries of the site and any fire shall be treated as an emergency. In the event of such an emergency the site shall be evacuated and closed to the public, the emergency services called as appropriate, and the Waste Regulation Authority informed forthwith.

10.6. Precautions and measures shall be taken to eliminate with any vermin and insects on the site. Details of these measures shall be set out in the working plan.
