Introductory note

This introductory note does not form a part of the notice

The following notice gives notice of the variation of an environmental permit.

This notice varies the permit for Rushywood Farm Anaerobic Digester from the standard rules SR2012 No 10 to the standard rules SR2012 No 9. Both sets of standard rules are for an on-farm anaerobic digestion facility using farm wastes only, including use of the resultant biogas, but this variation increases the maximum throughput from 100 tonnes of waste per day to 100,000 tonnes per year.

The schedules specify the changes made to the original permit.

The status log of a permit sets out the permitting history, including any changes to the permit reference number.
