Introductory note

This introductory note does not form a part of the notice

The following notice gives notice of the variation of an environmental permit.

This variation is to allow the relocation of the tanker offloading point of the leachate treatment plant (LTP) from its current location within the Risley Landfill, to immediately adjacent to the LTP to facilitate continued delivery of leachate from external sites for treatment. This will include a small additional area of land, a new bunded leachate holding tank, concrete hardstanding incorporating spill containment measures, plus associated pipework and services. Emissions from the process are not considered significant.

The schedules specify the changes made to the original permit.

The status log of a permit sets out the permitting history, including any changes to the permit reference number.
