Introductory note

This introductory note does not form a part of the notice.

The following notice gives notice of the transfer of an environmental permit to a new operator (the transferee) and notice of an Environment Agency initiated variation of the environmental permit carried out at the time of transfer.

Any changes made as a result of the transfer are set out in the schedules.

This permit authorises the storage of combustible waste and so we have varied it to include a standard condition that requires operators to take all appropriate measures to prevent fires on site and minimise the risk of pollution from them and, if required by us, to submit for approval a fire prevention plan that once approved must be implemented.

The changes made to the original permit as a result of the Environment Agency initiated variation are set out in schedule 3.

We consider that in reaching our decision to transfer and vary the permit we have taken into account all relevant considerations and legal requirements.

The status log of a permit sets out the permitting history, including any changes to the permit reference number.
